

What is Immersive Learning?

It is a way to simulate realistic scenarios and environments where children can practice skills and participate in an imaginary narrative.

Why is Immersive Learning so important to the children at Westbourne?

- Increases imagination.
- Helps create independent learners who are capable of presenting their learning in different ways.
- Gives the children a realistic experience of the timeline is set through narrative and environment.
- Contextualises learning.
- Creates an exciting narrative that immerses the children in their learning.

We believe that Immersive Learning strategies will support our creative and engaging curriculum and *provide an environment that will inspire curiosity, awe and wonder and help children to develop a passion for learning.* (ref: school vision statement)
